

THREE DAYS WORKSHOP ON VALIDATION AND EFFICIENT OPERATION OF ETP (SUGAR)

OBJECTIVE

Sugar factories situated in river Ganga Basin and elsewhere have already been directed for strict compliance of CPCB norms and a charter has also been prepared for sugar factory. In this regard sugar factories has gone a long way to upgrade and augment the existing setup of ETP. Time to time National Sugar Institute, Kanpur in association with CPCB has provided guidance by conducting seminars, workshops and training programme for executives, supervisory and operating staff of sugar factories with the objective to protect environment and conserve our natural resources.

In view of ETP validation & inspection carried out during season 2018-19 many sugar factories has updated their ETP and minimises their fresh water consumption but fine tuning with regards to regular compliance of CPCB norms is still a need of hour. It is observed that in many cases, the staff at the end of sugar factories is not well conversant with the modalities of validation & infact trained manpower is not available.

Thus, a three days non residential workshop is being organized at National Sugar Institute Kanpur for executive and supervisory staff of the factories to make them aware of the preparation required for third party inspection which is a regular activity to be carried out in every season by various institutions authorized by CPCB besides providing training on efficient operation of ETP, daily analysis and recording of performance parameters, maintaining of log books etc.
