**“Green Hydrogen from Sugar Industry- Opportunities & Challenges”**

**&**

**live Demo of “Green Hydrogen Pilot Plant”**

**6<sup>th</sup> December 2023**

**10.30 to 14.00 hours**

India is showing a growing interest in green hydrogen, along with many other countries around the world. Green hydrogen is considered a promising and sustainable energy source because it is produced using renewable energy sources and does not generate greenhouse gas emissions. The Government of India has announced National Hydrogen Mission to promote the development and utilization of hydrogen as a clean energy source. Sugar Industry which is a hub for production of clean, green and renewable energy can be a potential source of this “Fuel for the Future”

**Venue: National Sugar Institute, Kanpur**
